EXPERIENCE

BYU - Idaho, Rexburg, Id — *Student*
SEPTEMBER 2021 - DECEMBER 2023

- Gained strong understanding about importance of writing clean and efficient code
- Developed fully responsive websites from mockups that follow industry best practices and industry standards (WCAG)
- Handle DOM manipulation, user-agent events, use of third-party APIs, and JSON data through use of JavaScript
- Show skill with database servers (Relational and NoSQL) and tools to design and build basic databases needed for dynamic web applications.

CarMax, Naperville, IL — *Vehicle Condition Assessor*
FEBRUARY 2018 - PRESENT

- Accurately and efficiently appraise customer's vehicles leading to being in the top 5% of the company for performance for 3 consecutive years
- Train and develop new and current associates using effective communication and leadership skills allowing store to be among the best in performance in the Chicago region
- Improve department efficiency by developing and executing plans to problem solve hurdles for associates and self
- Serve as key resource by leading and initiating new projects that are being rolled out for company

PROJECTS

Mac X Mac — Full-Stack MERN Website

- Utilized Axios to make fetch request to backend REST API endpoints
- Implemented features to add to cart, checkout, and view order history
- Implemented Stripe API to handle and process payments
- Designed REST API for backend following Model/Route/Controller structure
- Implemented user authentication and authorization

Electrons — React and Tailwind

- Developed Frontend for fake electronics store utilizing React and Tailwind
- Utilized asynchronous JavaScript to fetch and retrieve data from DummyJSON API
- Implemented add to cart and checkout features

Sleep Outside — HTML, CSS, JavaScript

- Worked in a collaborative scrum environment to develop, test, debug, and troubleshoot code in a medium complexity web application
- Implemented modules to create a more efficient and organized code structure with help of ESLint
